

## 2021 **IECC**

## Energy-Efficient Codes Coalition 2021 IECC Voters Guide

- -

Thank you for doing your part to significantly strengthen the 2021 International Energy Conservation Code! This document outlines the most important energy efficiency and climate proposals—those that have the greatest potential to reduce energy use and carbon emissions in residential and commercial buildings by at least 10%.

We think all of these are important for your vote. If your time is limited, please focus on the priority proposals in the rows that are **bold and highlighted.** A **GREEN PROPOSAL NUMBER** indicates a vote to approve the proposal under consideration, which might be As Submitted (AS), As Modified by Committee (AM) or As Modified by Public Comment (AMPC). A **RED PROPOSAL NUMBER** indicates a vote to disapprove the proposal.

Code Change Proposal and Vote		Brief Residential Proposal Description
□ <b>RE7</b>	AMPC1	Increases lighting efficiency
□ RE10	D	Adds definition for sampling
□ RE20	AMPC1	Provides more information about code edition and compliance path
□ RE21	AS	Requires certificates include heating, cooling equipment sizing and Energy Rating Index scores
□ RE29	AS	Improves wall insulation in Climate Zones 4 and 5
□ <b>RE32</b>	AS	Adds slab insulation in Climate Zones 3, improves performance in Climate Zones 4 and 5
□ <b>RE33</b>	AS	Improves ceiling insulation in Climate Zones 2 and 3
□ <b>RE34</b>	AM	Eliminates floor insulation loophole in Climate Zones 5, 6, 7, and 8
🗆 RE35	AMPC1	Improves window efficiency in Climate Zones 3 and 4
□ <b>RE36</b>	AS	Improves ceiling insulation in Climate Zones 4 - 8
🗆 RE37	AS	Improves window thermal performance in Climate Zone 5
□ <b>RE40</b>	D	Weakens wall insulation based on framing factor
🗆 RE43	D	Adds sampling for testing and inspections
🗆 RE95	D	Adds sampling for air leakage testing
□ <b>RE102</b>	D	Creates a loophole for multifamily leakage testing
□ <b>RE110</b>	D	Removes duct sealing requirements
□ <b>RE112</b>	AS	Requires duct testing
□ <b>RE116</b>	D	Changes requirements and adds exemption for duct testing
□ <b>RE117</b>	D	Changes requirements and adds exemption for duct testing
□ <b>RE119</b>	D	Changes duct testing conditions, may increase air leakage
□ RE121	D	Adds sampling for duct testing
□ RE126	AS	Encourages higher efficiency water heating sources
🗆 RE139	AS	Requires balanced heat recovery or energy recovery ventilation in Climate Zones 7 and 8
□ <b>RE145</b>	AS	Requires dimmers on some lighting fixtures
<b>RE147</b>	AS	Requires electric circuits and receptacles near gas- and propane- equipment
□ <b>RE148</b>	AM PC1 and PC2	Closes loophole for exterior lighting in multifamily

## 2021 IECC

Code Change Proposal and Vote		Brief Residential Proposal Description
<b>RE151</b>	AS	Adds performance path thermal envelope backstop
□ <b>RE156</b>	D	Creates trade-off that allows efficiency reductions in buildings with renewable energy
🗆 RE157	AS	Removes loophole by deleting reference to sampling
□ RE165	D	Creates efficiency loophole for ducts within the home
□ RE166	D	Changes energy modeling for water heating
□ <b>RE171</b>	D	Changes energy modeling for HVAC distribution systems
□ <b>RE176</b>	D	Creates thermal envelope trade-off for minimum-efficiency equipment
□ RE182	AS	Improves Energy Rating Index envelope backstop in homes built with renewables
□ <b>RE184</b>	AS	Limits potential Energy Rating Index efficiency trade-off for renewable energy
□ RE186	D	Creates efficiency rollback for homes built under the Energy Rating Index path
□ RE190	D	Eliminates Energy Rating Index compliance path thermal envelope backstop
C RE192	AS	Lowers Energy Rating Index values
□ RE196	D	Weakens ERI compliance path thermal envelope backstop
□ <b>RE20</b> 4	AS	Requires renewable energy credits are retained or retired by homeowners
□ <b>RE208</b>	D	Creates equipment trade-off scheme
□ RE209	AS	Creates Flex Points Package option to give builders options, provide flexibility, and deliver 5% energy savings
□ <b>RE217</b>	D	Creates exemption from insulation in roof replacement
🗆 RE223	AMPC2	Provides jurisdictions with an optional net-zero energy homes appendix without sacrific- ing efficiency
□ RE224   &	D & D	Adds ASHRAE 90.2 stretch codes appendix

Code Change

Proposal and Vote		Brief Commercial Proposal Description
🗆 CE1   &	D & D	Expands IECC scope beyond efficiency and creates potential trade-offs
	D	Expands IECC scope beyond efficiency and adds confusing definitions
🗆 CE3   &	D & D	Expands IECC scope beyond efficiency and applies rigid cost-effectiveness requirements
🗆 CE5 I & II	D & D	Expands IECC scope beyond efficiency and adds competing priorities
	D	Expands IECC scope beyond efficiency and adds other priorities
□ CE7 I & II	D & D	Expands IECC scope beyond efficiency and includes energy production and storage
CE9 II	AS	Adds energy conservation to alternative compliance path considerations
	AS	Requires efficiency backstop for above-code programs
□ CE21	AMPC1	Clarifies bio-gas and biomass definitions to renewable energy definition
CE35	AM	Clarifies wall, above-grade definitions and improves insulation
□ CE43	D	Adds unclear and unenforceable compliance option for data centers
□ CE44	AMPC2	Creates compliance option for some multifamily units
CE49	AS	Improves performance path energy efficiency
CE54 II	D	Weakens efficiency in buildings built in tropical zone
□ CE55	AS	Requires that certificates include thermal envelope measures and scores
□ CE56	AS	Adds minimal efficiency requirements for greenhouses
CE57	D	Exempts utility buildings from envelope requirements
□ CE61	AS	Improves roof insulation in Climate Zones 4, 5, 6, 7, and 8

## 2021 **IECC**

Code Change Proposal and Vote		Brief Commercial Proposal Description
CE63	AS	Improves above-grade wall insulation in Climate Zones 4, 5, 6, 7, and 8
□ CE64	AS	Improves below-grade wall insulation in Climate Zones 4, 5, 6, 7, and 8
CE65	AS	Corrects joist-framing insulation error in Climate Zone 1
□ CE66	AS	Improves floor insulation in Climate Zones 4, 5, 6, 7, and 8
	AS	Corrects roof insulation error in Climate Zone 1
CE69	AS	Improves slab edge insulation in Climate Zones 7 and 8
□ CE73	AS	Corrects roof insulation error in Climate Zone 1
□ CE75	AS	Corrects wall insulation error in Climate Zone 5 and 7
□ CE79	AM	Reorganizes and reclassifies current slab-on-grade insulation requirements
□ CE80	AS	Designates airspace requirements as mandatory
🗆 CE93 I	D	Creates storm shelter fenestration loophole
CE96	AM	Adds air leakage testing requirement in multifamily
CE97	AM	Adds air leakage testing requirement for more buildings
CE99	AM	Requires air barrier verification certification
CE104	D	Creates equipment room insulation loophole
CE111	AM	Requires fault detection for large heating and cooling systems
□ CE140	AMPC1	Requires efficient fans in multifamily buildings
CE150   & II	D & D	Requires removable protective barrier on piping insulation and lowers efficiency
CE162	AM	Increases lighting efficiency on some fixtures
CE181	AMPC1	Adds manual option for lighting controls
□ CE199	AMPC1, PC2, PC3	Requires lighting controls for parking garages
CE209	AM	Closes loophole for lighting efficiency requirements in indoor agriculture
CE215	AM	Establishes energy monitoring system requirements
CE216	AM	Adds automatic plug load control requirements
🗆 CE217 I, II	AM, AS	Makes buildings electric vehicle ready
CE218	AM	Gives builders points-based options, adds flexibility, and delivers 2.5% energy savings
CE219	AS	Increases points-based compliance option efficiency
□ CE220	AS	Increases points-based compliance option efficiency
CE226	AM	Adds multifamily lighting to the points based options
□ CE240	AS	Adds efficient kitchen equipment to the points based option
□ CE247	AS	Updates performance path assumptions for above-grade walls
CE256	D	Creates unneeded exception for roof insulation replacement in existing buildings
CE261	AS	Revises change-of-occupancy or use requirements
CE262	AS	Adds energy storage system space in solar-ready zone appendix
	D, D, D	Creates new appendix that requires solar without efficiency
CE265	D	Adds option to trade off on-site energy storage systems for efficiency

For a more complete summary and discussion of EECC's recommendations on these and other proposals, see the Detailed EECC Online Voting Guides. For questions, comments and more information, please contact:
