State Technical Review Board, Part II

Following the process from the Local Board of Building Code Appeals to the State Technical Review Board and its outcome

Seaside Ballroom D 1:00 – 2:30 pm (1.5 CEU)

Presenter: Raymond O’Brocki, American Wood Council
Construction Fire Safety Best Practices

This Course introduces inspectors to the codes that safeguard buildings undergoing construction, major renovation, and demolition. The course discusses best practices regarding hot work, housekeeping, storage, and site security. Students will learn the requirement and responsibilities of the construction site fire prevention program manager and the components of a well-crafted construction site pre-fire plan. They will preview the construction fire safety code changes coming in the 2021 edition of the International Fire Code.

Seaside Ballroom D 2:30 – 4:00 pm TBA (1.5 CEU)

Presenter: Stephen Savarie, HILTI
Red Flags of Firestop

This course examines the need for firestop and provides an overview of how the model building codes are addressing the issue.

Goodman 1:00 – 2:30 (1.5 CEU)

Presenter: Marjorie King, Regulatory Boards Administrator
DPOR Board of Contractors Update

Discussion of new and current DPOR regulations and how it affects local building departments

Goodman 2:30 – 4:00 (1.5 CEU)

Presenter: Debby McMahan, Fairfax County
Permit Tech Exam Tips and Tricks

The training will assist those who plan to take Permit Tech Test, this class was originally created by the VBCOA Permit Tech Committee with input from all current and previous technicians to assist future technicians with lessons learned, tips and hands on practice.

*DHCD Code Change Updates***

Residential Code Change Trainings –Providing training that will help learn and understand the significant changes to the residential codes

Seaside Ballroom D (6 CEU)

Presenter Steve Thomas, CBO
*Applying the Code to Cannabis Facilities** (6 CEU)*

The legalization of recreational cannabis in some states to the public began a new industry. Many building departments are struggling with how to address this influx of business. This training will assist the code officials understand related to how the codes are applied to grow facilities, extraction facilities, dispensaries, and other related uses.

**** - MUST ATTEND BOTH SESSIONS TO RECEIVE CREDIT - ****

Goodman (3 CEU)

Presenter: William F. Foley, Business Development Manager,
USG Structural Solutions

Design Guide for Exterior Sheathings (3 CEU)

The program illustrates how to defend a structure from the potential problems nature imposes. Some of the solutions discussed are spray membranes, vapor barriers, air barriers, moisture migration paths, hygrothermal analysis, thermal bridging, thermal gradients, and climatic zone implications to the building envelope design.

Structural Cementitious Panels

This presentation provides an introduction to fiber-reinforced, inorganic, composite panels as noncombustible structural cementitious floor sheathing panels. The sheathing panels described in this presentation are intended to be installed over cold-formed steel framing and used as a combination sub-floor and underlayment. Installation is intended to be limited to protected, interior locations.

12:00 p.m.

Lunch-Seaside Foyer/Ballroom E

Raffle cards must be completed by noon for the giveaway which will be held at 12:30 pm during lunch in Ballroom E
